

Specification Amendments

Please replace the paragraph beginning on page 13, line 1, with the amended paragraph, as follows:

Referring now to FIG. 5a, conventional compliant fingertips 12a (e.g. plastics) have certain component force vectors 70 that create resultant vectors 72, which tend to force an object being grasped from between the fingertips. Specifically, the fingertips are surrounded by a cosmetic glove or protective glove 62 and have a compliant material 64 adhered to the end of the fingertip. The fingertips can include digit tip pads 63 attached to the end of each of the fingertips and configured to rotatably contact 65 an object when the tip pad comes in contact with the object to allow the compliant fingertips to more easily hold gripped objects.
